MORESCO Corporation

MORESCO Group delivers sustainable one-of-a-kind products

The 66th Term Financial Results Briefing Material

(From March 1, 2023 to February 29, 2024)

Tokyo Stock Exchange Standard Market 5018 (Petroleum and Coal Products)

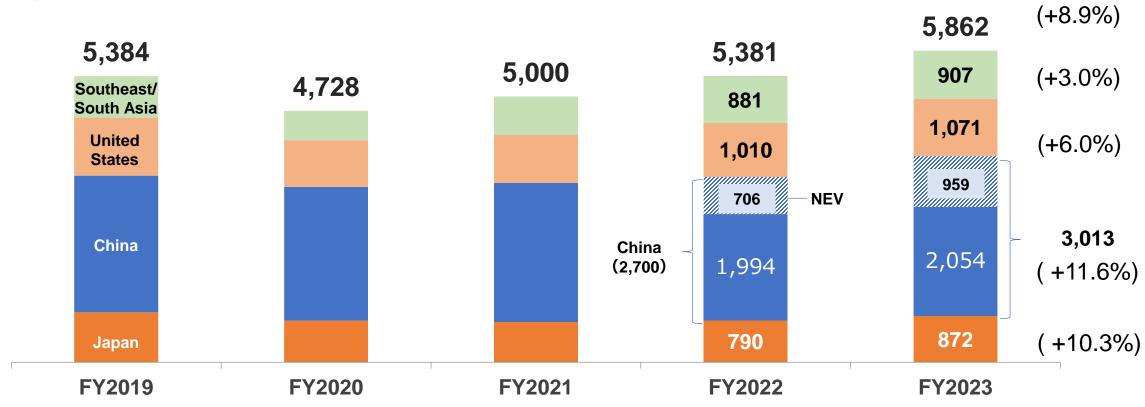

April 22, 2024

Business Environment - Volume of automobile production

Volume of automobile production in areas where our business sites are located

10,000 units (% compared to previous year)

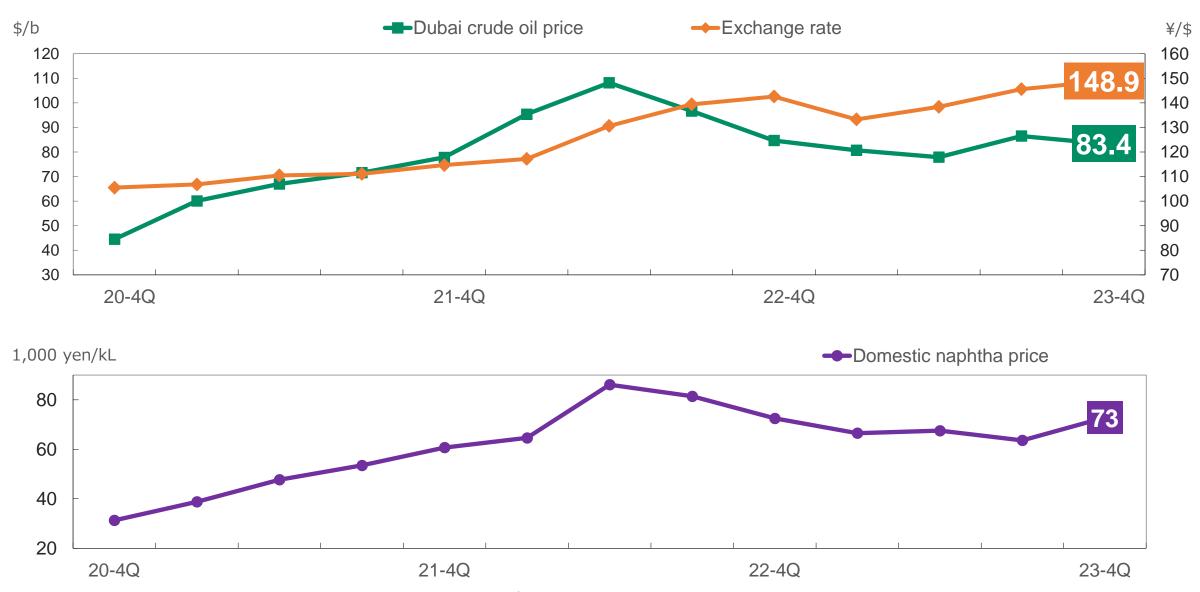

Source: Prepared by MORESCO based on data released by MarkLines Co., Ltd.

Note 1: Data is aggregated based on MORESCO's fiscal year (Japan: March to February, overseas: January to December).

Note 2: Data for Southeast/South Asia includes only Thailand, Indonesia, and India, where we have operating sites.

Business Environment - Trends in crude oil, foreign exchange, and naphtha prices* moresco

^{*} The average exchange rate in the fiscal year ended February 2024 was ¥141.2/\$1. Note: The prices of crude oil and naphtha and the exchange rates are on a three-month average basis.

Consolidated Statement of Income

Recorded higher sales and profits thanks to sales price adjustments and an increase in the overseas sales volume, and recognized extraordinary income in association with making an affiliate a wholly owned subsidiary.

(Million yen)	FY2022	FY2023	Year-on-year change
Net sales	30,333	31,886	+5.1%
Gross profit	8,129	8,984	+10.5%
SG&A	7,606	7,759	+2.0%
Operating profit	523	1,225	+134.2%
Non-operating profit (loss)	523	601	+15.0%
Ordinary profit	1,046	1,826	+74.6%
Profit before tax	1,046	2,055	+96.5%
Profit*	615	1,283	+108.8%

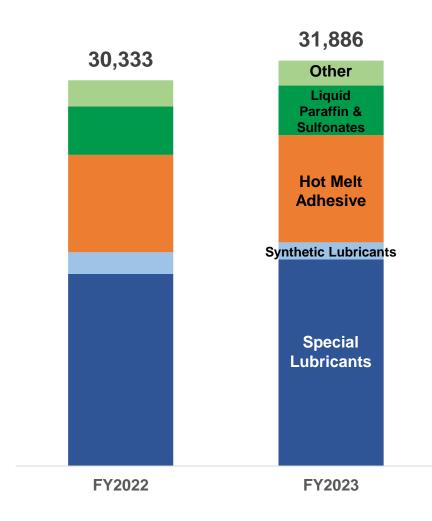

^{*} Profit attributable to owners of parent, the same hereafter

Net sales by Business Segment

Sales of products related to automobiles and sanitary materials were robust. On the other hand, investments in data centers continued to be sluggish.

(Million yen)	FY2022	FY2023	Year-on- year change
Special Lubricants	15,105	16,247	+8%
Hot Melt Adhesive	7,664	8,430	+10%
Synthetic Lubricants	1,703	1,337	▲ 22%
Liquid Paraffin & Sulfonates	3,793	3,909	+3%
Other	2,068	1,963	▲ 5%
Total net sales	30,333	31,886	+5%

Special Lubricants

[Net sales] Up 7.6% year on year (¥16,247 million) [Sales volume] Up 1.5% year on year

> DC fluids

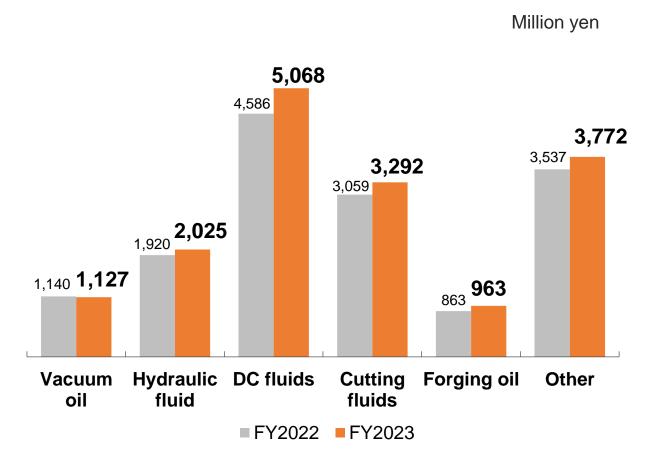

In addition to an increase in the volume of automobile production, shipments of minimum-quantity spray-type lubricants also increased.

Cutting fluids

Sales to new customers in Southeast/ South Asia and North America increased.

> Vacuum oil

Export to China was sluggish.

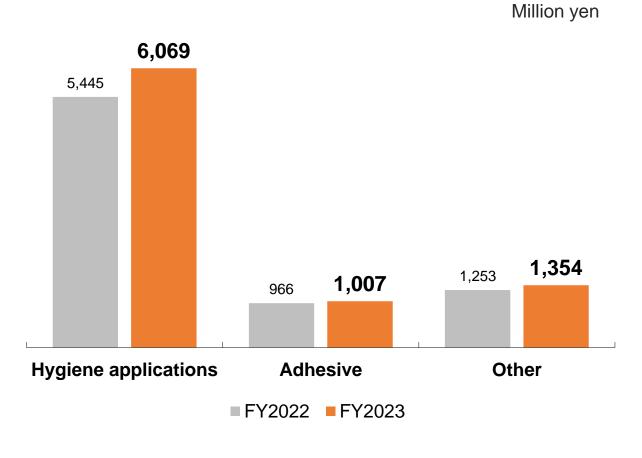

Hot Melt Adhesive

[Net sales] Up 10.0% year on year (¥8,430 million)

[Sales volume] Up 8.0% year on year

- > Hygiene applications
 Sales of products for disposable diapers
 applications were favorable in major areas.
- Adhesive
 Sales volume increased due to price adjustments as well as sales growth in Southeast/South Asia.

Liquid Paraffin & Sulfonates

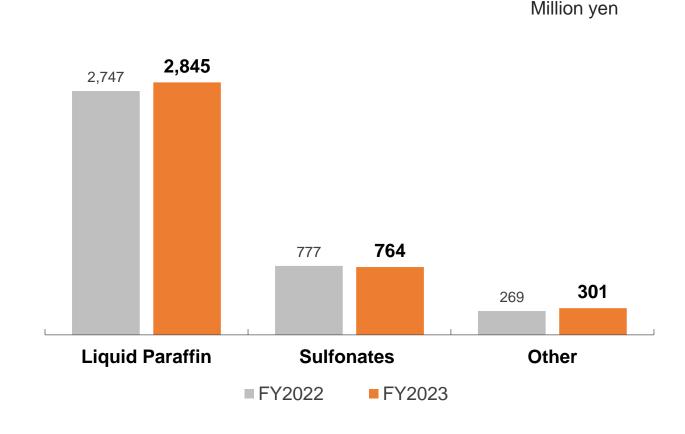

[Net sales] Up 3.1% year on year (¥3,909 million) [Sales volume] Down 4.5% year on year

>Liquid Paraffin

Net sales increased slightly due to sales price adjustments, despite a decline in sales volume of products for polystyrene plasticizer applications.

≻Sulfonates

Remained roughly even from a year ago.

Synthetic Lubricants

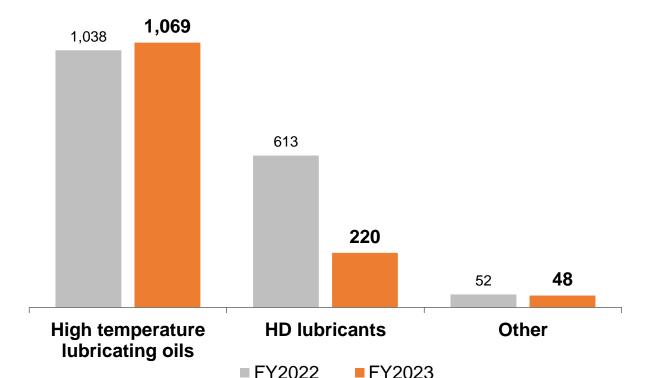

(Unit: Million yen)

[Net sales] Down 21.5% year on year (¥1,337 million) [Sales volume] Down 12.4% year on year

➤ High temperature lubricating oils
Sales increased due to price adjustments,
as well as the recovery trend seen in the
latter half of the fiscal year.

>HD lubricants

Sales decreased due to the impact of sluggish investments in data centers.

Consolidated Statement of Income

Net sales

- Recovery in automobile production
- Adjustments of sales prices

Operating profit

- Securing gross profit by adjusting sales price
- An increase in shipment of highvalue-added products
- Curtailment of selling, general and administrative expenses

Profit

- Recognition of extraordinary income in association with making an affiliate a wholly owned subsidiary
- Recognition of foreign exchange gains

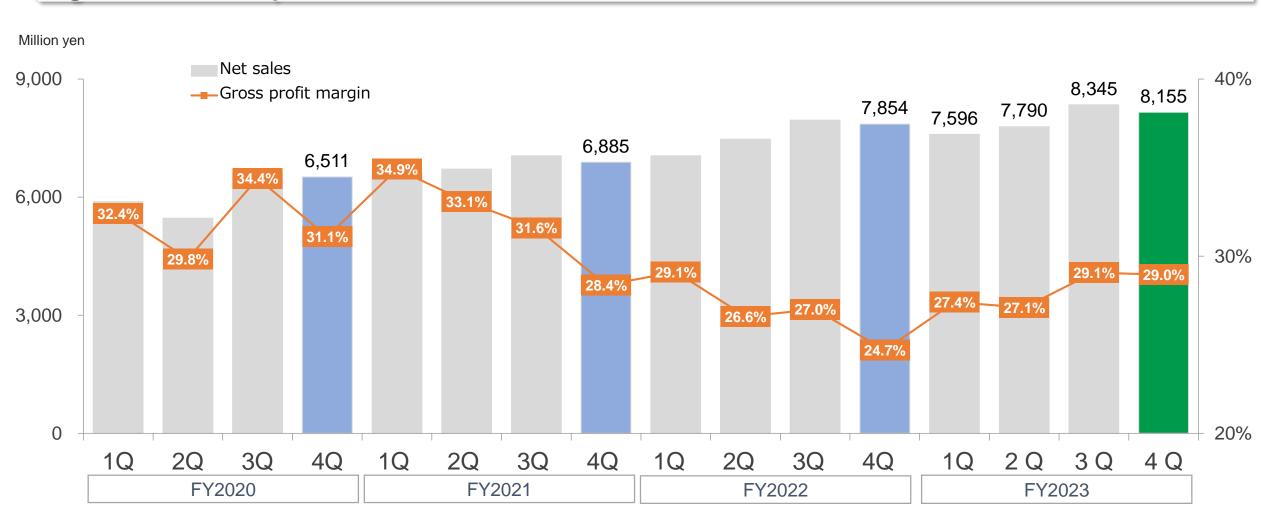

(Million yen)	FY2022	FY2023	Year-on-year change
Net sales	30,333	31,886	+5.1%
Gross profit	8,129	8,984	+10.5%
SG&A	7,606	7,759	+2.0%
R&D expenses	(1,246)	(1,321)	+6.0%
Operating profit	523	1,225	+134.2%
Non-operating profit (loss)	523	601	+15.0%
Ordinary profit	1,046	1,826	+74.6%
Profit before tax	1,046	2,055	+96.5%
Profit*	615	1,283	+108.8%

^{*} Profit attributable to owners of parent, the same hereafter Copyright © MORESCO Corporation All Rights Reserved.

Net Sales and Gross Profit Margin

Recovery in the margin due to the promotion of price adjustments and an increase in sales of high-value-added products

Segment Profits and Losses

[Japan] Recorded higher sales and profits as the sales volume of major products exceeded the previous fiscal year

and the price adjustments progressed.

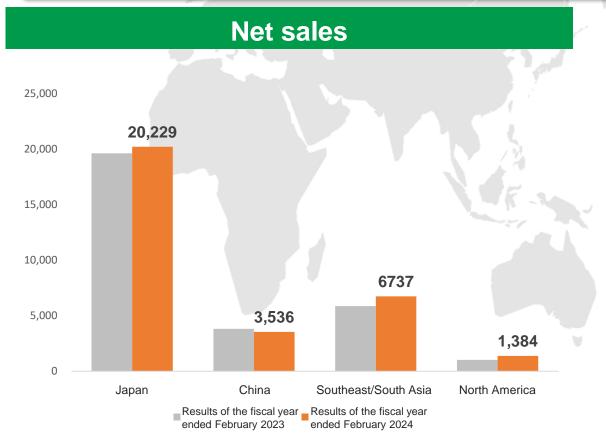

[China] Both sales and profits declined due to lower operation rates at Japanese automobile manufacturers and a

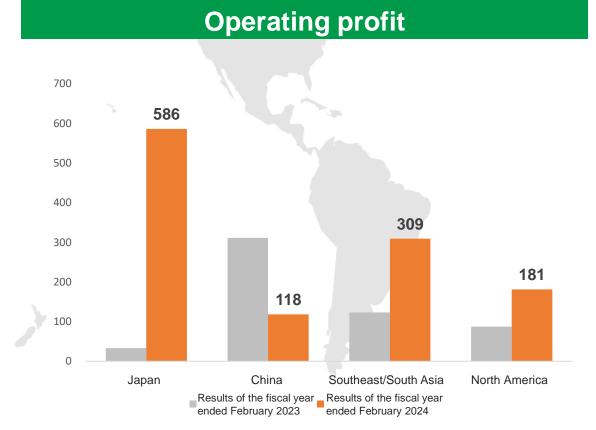

decline in demand for hot melt adhesives for filters.

[Southeast/South Asia] Recorded higher sales and profits due to the recovery in the automobile production volume and the sales

expansion of hot melt adhesives.

[North America] Recorded higher sales and profits due to an increase in shipment of minimum-quantity spray-type lubricants.

Medium-Term Management Plan

MORESCO Group delivers sustainable one-of-a-kind products

FY2024-FY2026

MORESCO Corporation February 2024

Summary of the 9th Medium-Term Management Plan

Business performance

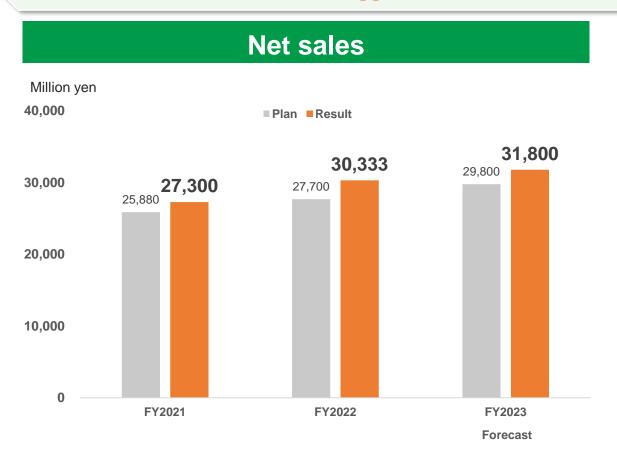

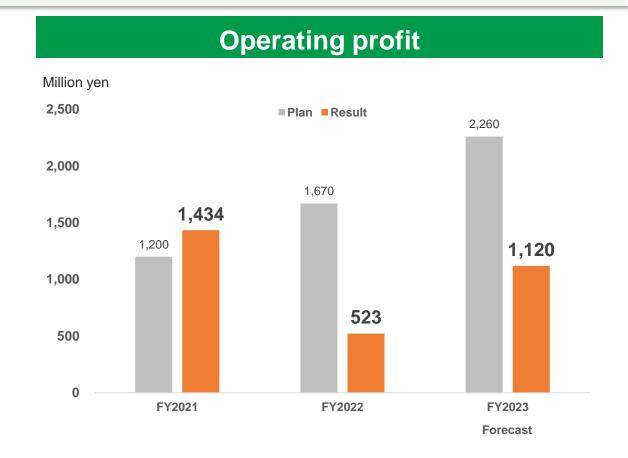

[Net sales]

Increased due to an increase in shipments resulting from recovery in automobile production, as well as the weaker yen

[Operating profit]

Remained at a certain level due to a time lag between soaring raw material prices and sales price increases, sluggish data center investment, etc.

Summary of the 9th Medium-Term Management Plan - Major achievements and ongoing issues

■ Promote ROIC management to enhance

capital efficiency

Medium-Term Corporate Policies Major achievements		Ongoing issues	
Contribute to realization of a sustainable society (Promotion of sustainability management)	 Start of the certification system for MORESCO Green SX (hereinafter "MGS") products* Establishment of Corporate Sustainability Department and committees 	 Expansion of MORESCO Green SX products Acceleration of product development on the theme of environmental responsiveness 	
Increase added value of business and develop new business fields	 Progress in price correction in key areas Reinforcement of company-wide development system Industry-academia collaboration with external organizations 	 Expansion of target products by continuing price correction activities Commercialization of research results in new business fields 	
Reduce manufacturing costs and improve quality	 Renewal of aging equipment, system automation (quality control), etc. 	Deployment of domestic know-how overseas	
4) Improve operational efficiency in the administrative division	 Work style reform using DX (choice of diverse work styles) 	 Further improvement in operational efficiency by utilizing DX/AI technology, etc. 	
5) Enhance compliance	 Expansion of in-house training programs 	Establishment of a global compliance system	
Overseas strategy			
■ Promote business development in China, North America, and emerging countries	 Introduction of executive officers in charge for our three major overseas areas (Southeast/South Asia, China, and North America) Restructuring of China business Reinforcement of the North American lubricant business through acquisitions 	 Improving profitability of China business Business expansion in North America and Mexico 	
Capital strategy			

employee awareness

(Reference) https://www.moresco.co.jp/en/sustainability/sdgs.php

Establishment of ROIC project team and enhancement of
 Utilization of ROIC indicators, etc.

^{*} Products that may significantly contribute to the issues of materiality based on evaluation of the entire product cycle, from procurement of raw materials to disposal, are certified as MORESCO Green SX products.

Theme of the 10th Medium-Term Management Plan

Achieving both "realization of a sustainable society" and "increasing added value of business"

Basic policies

Major initiatives

Promotion of Sustainability Management

- Promotion of carbon neutrality · Increasing MGS product sales ratio
- Efforts to reduce environmental impact

Enhancement of Our Product Portfolio

- Development and sales expansion of high-value-added products
- Response to circular economy

Creation of Next-Generation Business

- Focus on life science business
- Development of technology to create non-petrochemical materials
- Promoting businesses related to perovskite solar cells

Innovation of Business Processes

- Innovation of production processes
- Promotion of DX
- Addressing logistics issues

Improvement of the Return on Capital

- Measures to improve PBR · Shareholder returns
- Promotion of human capital management
- Strengthening IR activities

10th Medium-Term Management Plan - Business targets

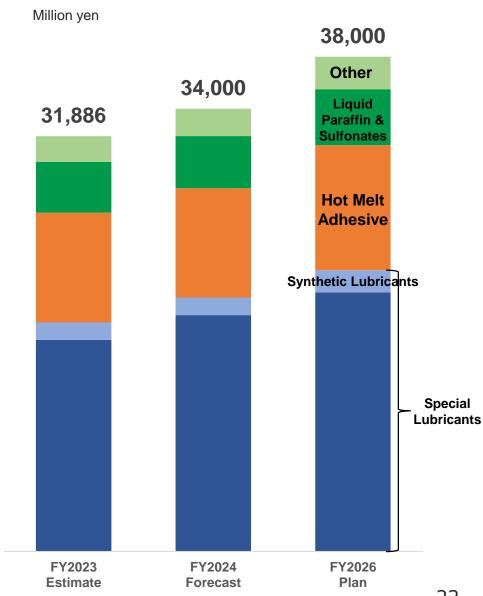

Million yen		FY2023 Estimate	FY2024 Forecast	FY2026 Plan
	Net sales	31,886	34,000	38,000
	Sales growth rate	-	7%	6%
Performance	Operating profit	1,225	1,500	2,700
	Operating profit margin	3.8%	4%	7%
	Ordinary profit	1,826	1,850	3,000
Capital efficiency	ROE	6.6%	-	8% level
Capital efficiency	Consolidated payout ratio	32.4%	39.3%	30% or more
Non-financial	Sales ratio of MGS products	29% (2022 result)	-	40%
targets	CO ₂ emissions reduction rate * Compared to 2013	34% (2022 result)	-	-

10th Medium-Term Management Plan - Net sales by business segment

Division	FY2023 Estimate	FY2024 Forecast	FY2026 Plan
Special Lubricants	17,584	19,500	21,600
(Synthetic Lubricants)	(1,337)	(1,350)	(1,700)
Hot Melt Adhesive	8, 430	8,400	9,600
Liquid Paraffin & Sulfonates	3,909	4,000	4,300
Other (including subsidiaries)	1,963	2,100	2,500
Total net sales	31,886	34,000	38,000

10th Medium-Term Management Plan - Priority measures

Priority meas	Priority measures by division				
Division	Japan	Overseas			
Special Lubricants (■Synthetic Lubricants)	 Expanding efforts for circular economy from the raw material perspective, further utilizing biomass materials and recycled resources Development and sales of fluorine alternative lubricants for semiconductor manufacturing (front-end process) and inspection equipment, etc. Development of hard disk drive lubricant for next-generation data centers 	 Capturing demand from the new energy vehicle market, which is expected to grow in the die-casting fluids field Realization of synergy effects such as in-house procurement of main materials (silicone) in North America and supply to other sites Accelerating overseas expansion of ADE-related products 			
Hot Melt Adhesive	 Promotion of price correction and optimization of production efficiency through product consolidation Promote participation in recycling business and expansion into medical applications 	Increasing profitability by revitalizing sales activities at overseas bases and expanding sales of high-value-added products			
Liquid Paraffin & Sulfonates	 Development of liquid paraffin applications in cosmetics and medical fields Expanding sales of sulfonates and reviewing production methods for environmental friendliness 	> Accelerate overseas expansion of sulfonates			
Other (including subsidiaries)	 Development of sealants for perovskite solar cells and electronic paper Promoting development of high-performance materials for OPV (organic photovoltaics) Expansion of products related to wastewater treatment and cleaning (equipment and peripheral products) that contribute to environmental protection Pursuit of environmental impact reduction in automotive chemical products and heat transfer media 				

Strengthen the global system on a continuing basis

• Strengthening of R&D functions in each region • Prompt responses to local customers • Early stabilization of operation of the new plants in China • Considering establishment of a Mexican subsidiary and business expansion

> Advance both growth strategy and capital/financial strategy to achieve "improvement of the return on capital"

Growth strategy

Promotion of Sustainability Management/Enhancement of Our Product Portfolio/Creation of Next-Generation Business

- Development and sales of MGS products which is high-value-added products
- Promote enhancement of a product portfolio
- Launch nanoemulsion products and out-license autophagy activating drugs in the life science business
- Expand business in overseas growth markets centered around Southeast/South Asia, North America, and China

Capital and financial strategies

Promotion of profitability improvement measures/Shareholder returns/Human capital management/Strengthening IR activities

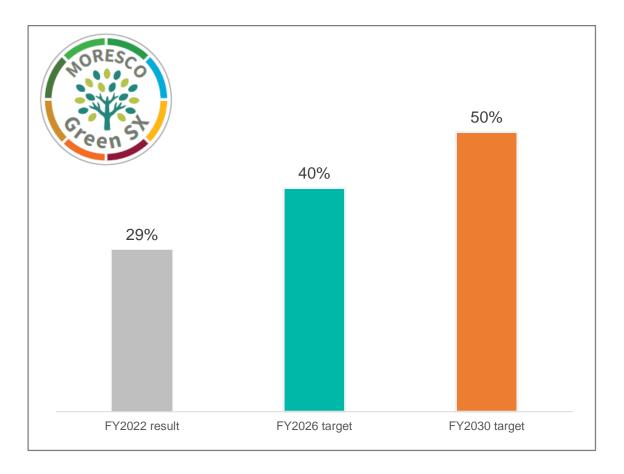

- Promote measures that will lead to improved profitability in each business division (utilization of ROIC indicators, etc.)
- Positioning shareholder returns as a key management issue, implement a dividend policy aimed at a consolidated dividend payout ratio of 30% or more
- Promote human capital management
- Enhance IR information and hold active dialogue with investors

Promotion of Sustainability Management- MORESCO Green SX products sales ratio

- > Promoting efforts to improve existing products and develop new products to achieve 2030 targets
- Promoting enhancement of a product portfolio by expanding sales of MORESCO Green SX products which is high-value-added products

Sales ratio targets

Representative products

Water-soluble minimum quantity spray-type lubricant GRAPHACE MQ series

Energy conservation

Environmental protection

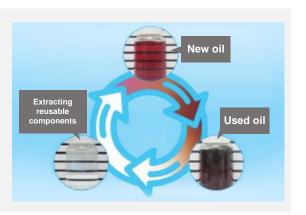

Improving work environment

Water-glycol fire-resistant hydraulic fluid HYDOL

CO₂ emission reduction

Environmental protection

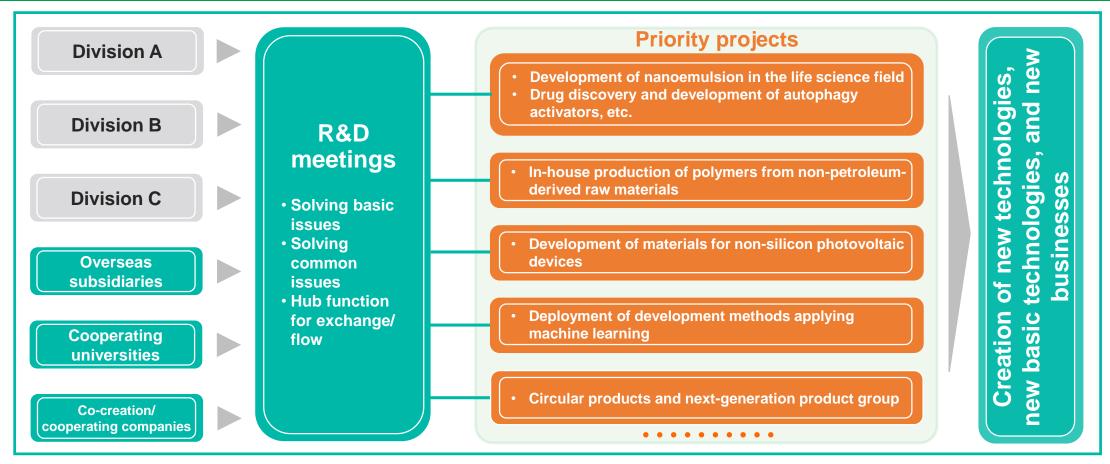

Creation of Next-Generation Business - Corporate R&D system

- > Establish a development system across Divisions, based on collaborations within the company and with industry, government, and academia. Flexibly review priority projects.
- Promote MOLGADC*, a company-wide project, and achieve results.

Project MOLGADC overview

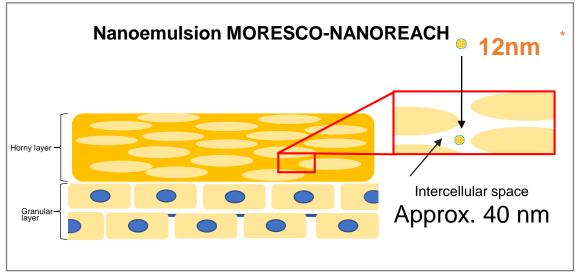

^{*} Named after the initials of priority projects (initially five projects). Now expanded to eight Copyright © MORESCO Corporation All Rights Reserved.

Creation of Next-Generation Business - Life science business

Commercialization of nanoemulsion

- Establish a mass production system in response to adoption by major cosmetics manufacturers
- Develop nanoemulsion containing CBD (cannabidiol)
- Develop in-house cosmetics containing nanoemulsion

* nm: nanometer 10-9 meters (m) = one billionth of a meter

Patent applications in the drug development field

- ➤ Invested in AutoPhagyGO, a venture started from a university, in July 2020 and commenced joint research and development.
- ➤ Made the first application for a patent related to autophagy activating drugs at the end of February 2024.

- Autophagy research refers to research that leads to prevention and cure of various phenomena and diseases related to aging.
- In the joint research, drug development activities are being undertaken for autophagy that can be expected to improve lifestyle-related diseases.
- > The aim is to obtain important compounds, the pharmacological efficacy of which is improved.

Creation of Next-Generation Business

- Development of technology to create non-petrochemical materials

Methane

fermentation

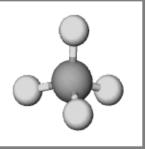

- Promote the establishment of technology to synthesize non-petrochemical hydrocarbons from methane, which has a high global warming potential, as a raw material
- > Produce 10 tons of bio formic acid per year by 2026, and aim for domestic production and in-house procurement of non-petrochemical materials in the future

Hokko bio-gas plant

Biogas

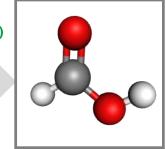

Chemical reaction (light + air + catalyst)

Aiming for use of

materials

our products as raw

Biopolymer (tentative name)

Cow excrement, food waste, etc.

MORESCO participates in the Okoppe Town (Hokkaido) Carbon Neutral Innovation Consortium (OCNIC) and aims to promote resource circulation and biogas plants by utilizing its synthesis and refining technologies while contributing to improving the productivity of bio formic acid.

Silage (grass)

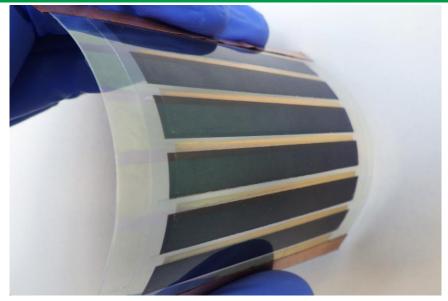

➤ Participating in a consortium launched by Prof. Miyasaka, Toin University of Yokohama Contributing to the commercialization of perovskite solar cells within 2026 by providing high-performance sealants

Participating in the consortium

Consortium Peccel Technologies, Inc. (Representative: Prof. Miyasaka) **MORESCO Corporation** MACNICA, Inc. **REIKO Co., Ltd. Mitsubishi Chemical Corporation**

Prototype of next-generation solar cell "perovskite"

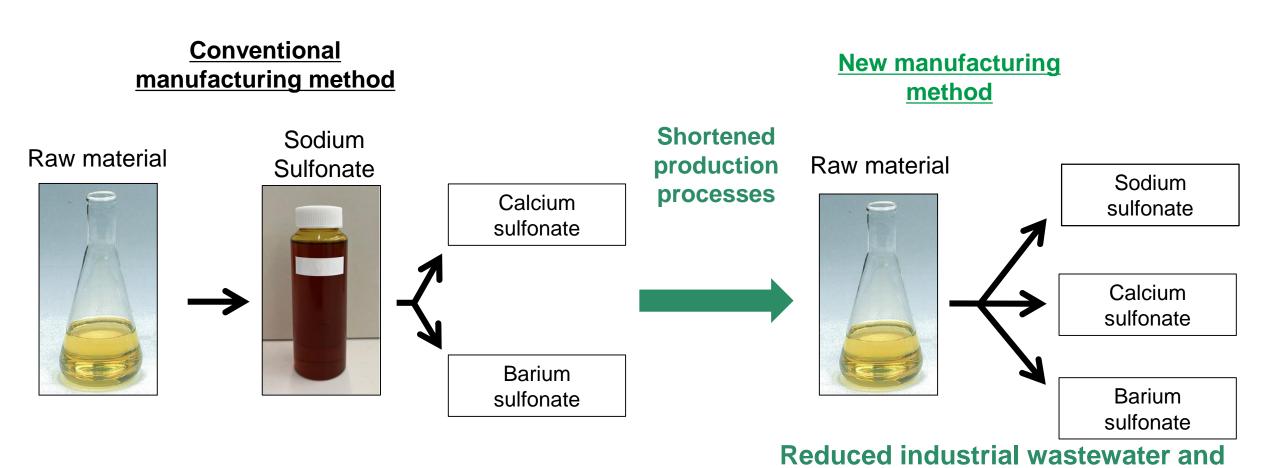

(Source: Toin University of Yokohama)

Features of our sealant

- 1. No damage to perovskite elements even when directly bonded
- Demonstrates excellent adhesion simply by pasting onto the base material (No heating or UV treatment required)

> Developing new manufacturing processes that lead to shortened production processes and reduced industrial wastewater and wastes, among others

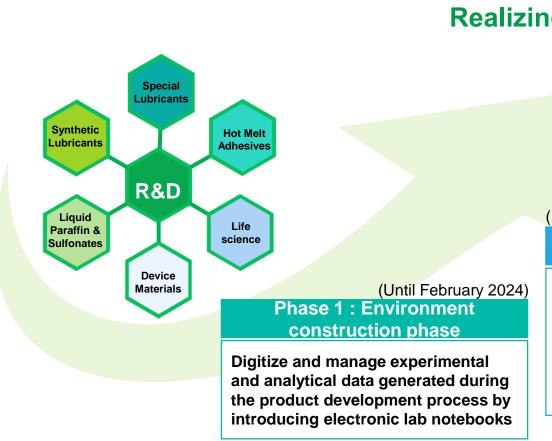

wastes

Innovation of Business Processes - Driving R&D with informatics

- Innovate MORESCO's material development process across business divisions centered on the R&D division
- Develop and improve products quickly and efficiently by incorporating a data-driven approach

Realizing "MORESCO Informatics," a form of R&D DX that only MORESCO can do

(From March 2024)

Phase 2: Trial-and-error phase

Build a materials informatics approach optimized for each business area based on digitally managed experimental and analytical data

Phase 3: Value creation phase

Develop new products and improve existing products using a materials informatics approach optimized for each business area
