

NO.0302-00768K-02

Water-base plunger lubricant for die casting machine

NEOCASTER PW-60

Description

NEOCASTER PW-60 is a water-base plunger lubricant developed for die cast plunger lubrication system.

NEOCASTER PW-60 is produced, based on water in which fine lubricant is homogeneity blended to improve the lubricity at high temperature and pressure, the factory maintenance problem.

NEOCASTER PW-60 is a high grade water-base plunger lubricant and include the selected natural graphite.

Characteristics

Excellent lubricity and the tip wetting properties.

Prevent the wear and seize up for the plunger tip

Involving the gas decreases.

Reduce the generation of blowhole.

No flush point

Maintain a safe hazard-free working place.

General Properties

Appearance		Charcoal gray emulsion
Density	15°C g/cm ³	1.00
Viscosity	30°C Pa·s	1.8
Pour point	°C	2.5
Flash point	°C	None

How to Use

1. Use neat fluid directly.
2. NEOCASTER PW-60 should be used by air blow after drip or spray into the sleeve.

Storage

Please refer to Material Safety Data Sheet (M.S.D.S.)

Package

20 liters / can

200 liters / drum
